Market and outlook

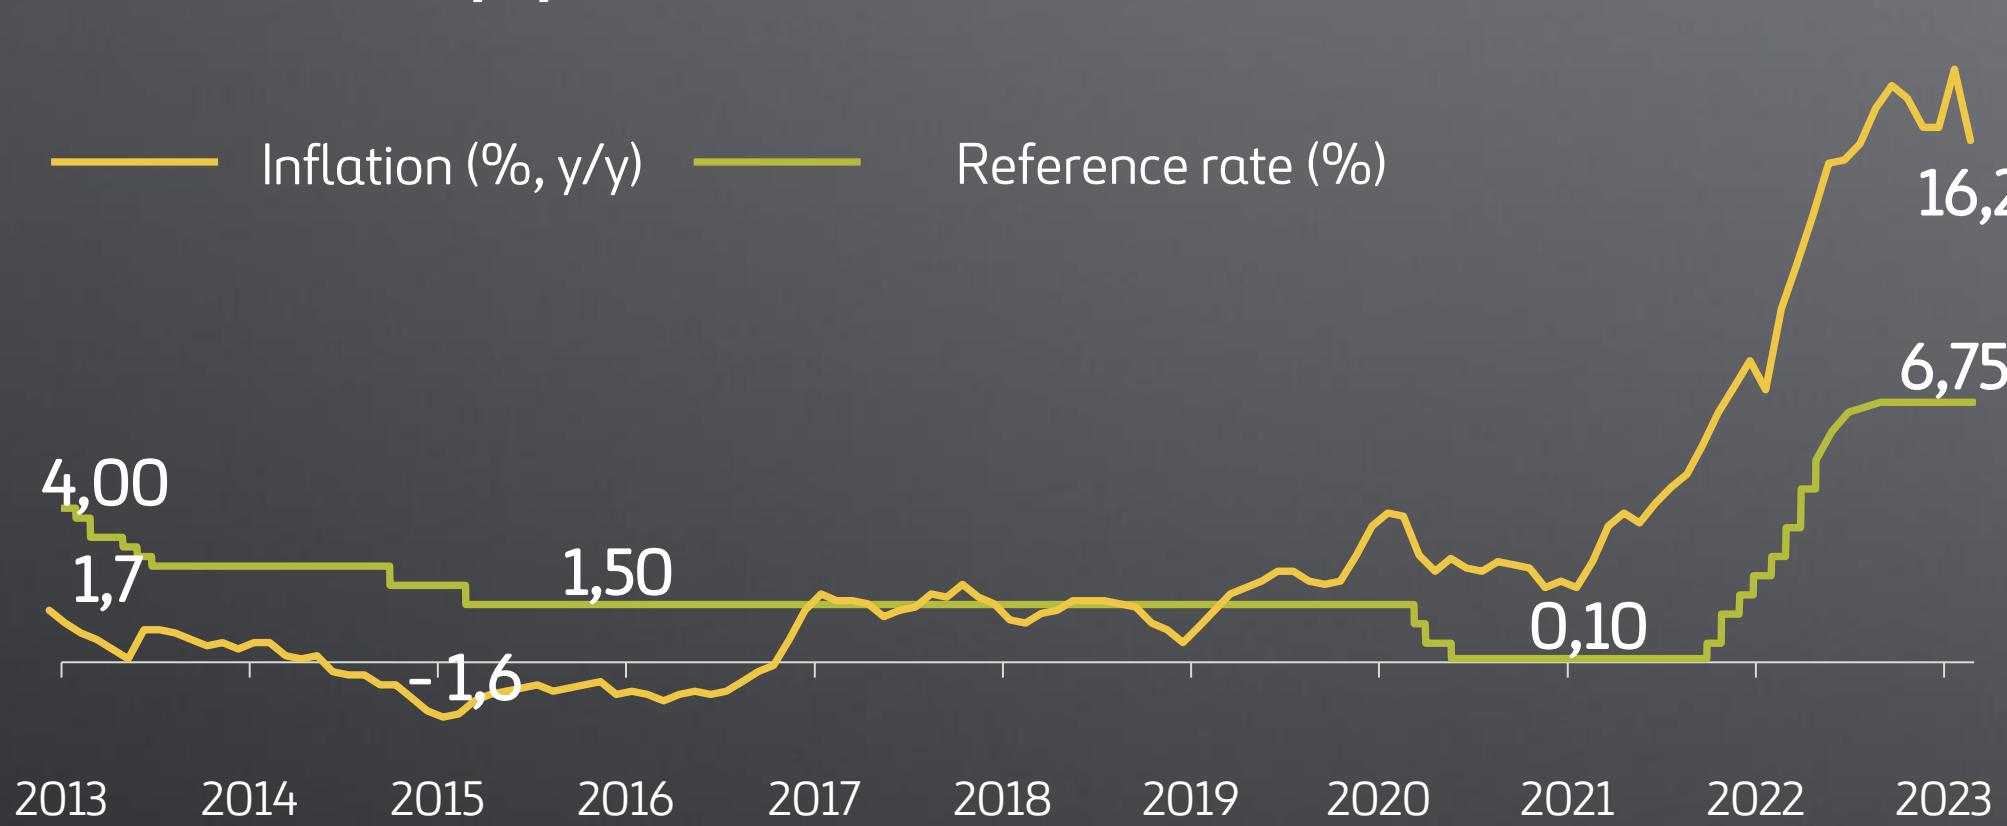

Macroeconomic background

GDP dynamics and CPI inflation in Poland (%), y/y

The IMF forecasts sustained inflation at double-digit levels and a significant weakening of GDP growth to 0.3% y/y in 2023. Inflation in 2024 should be characterised by single-digit growth at 6.1% y/y.

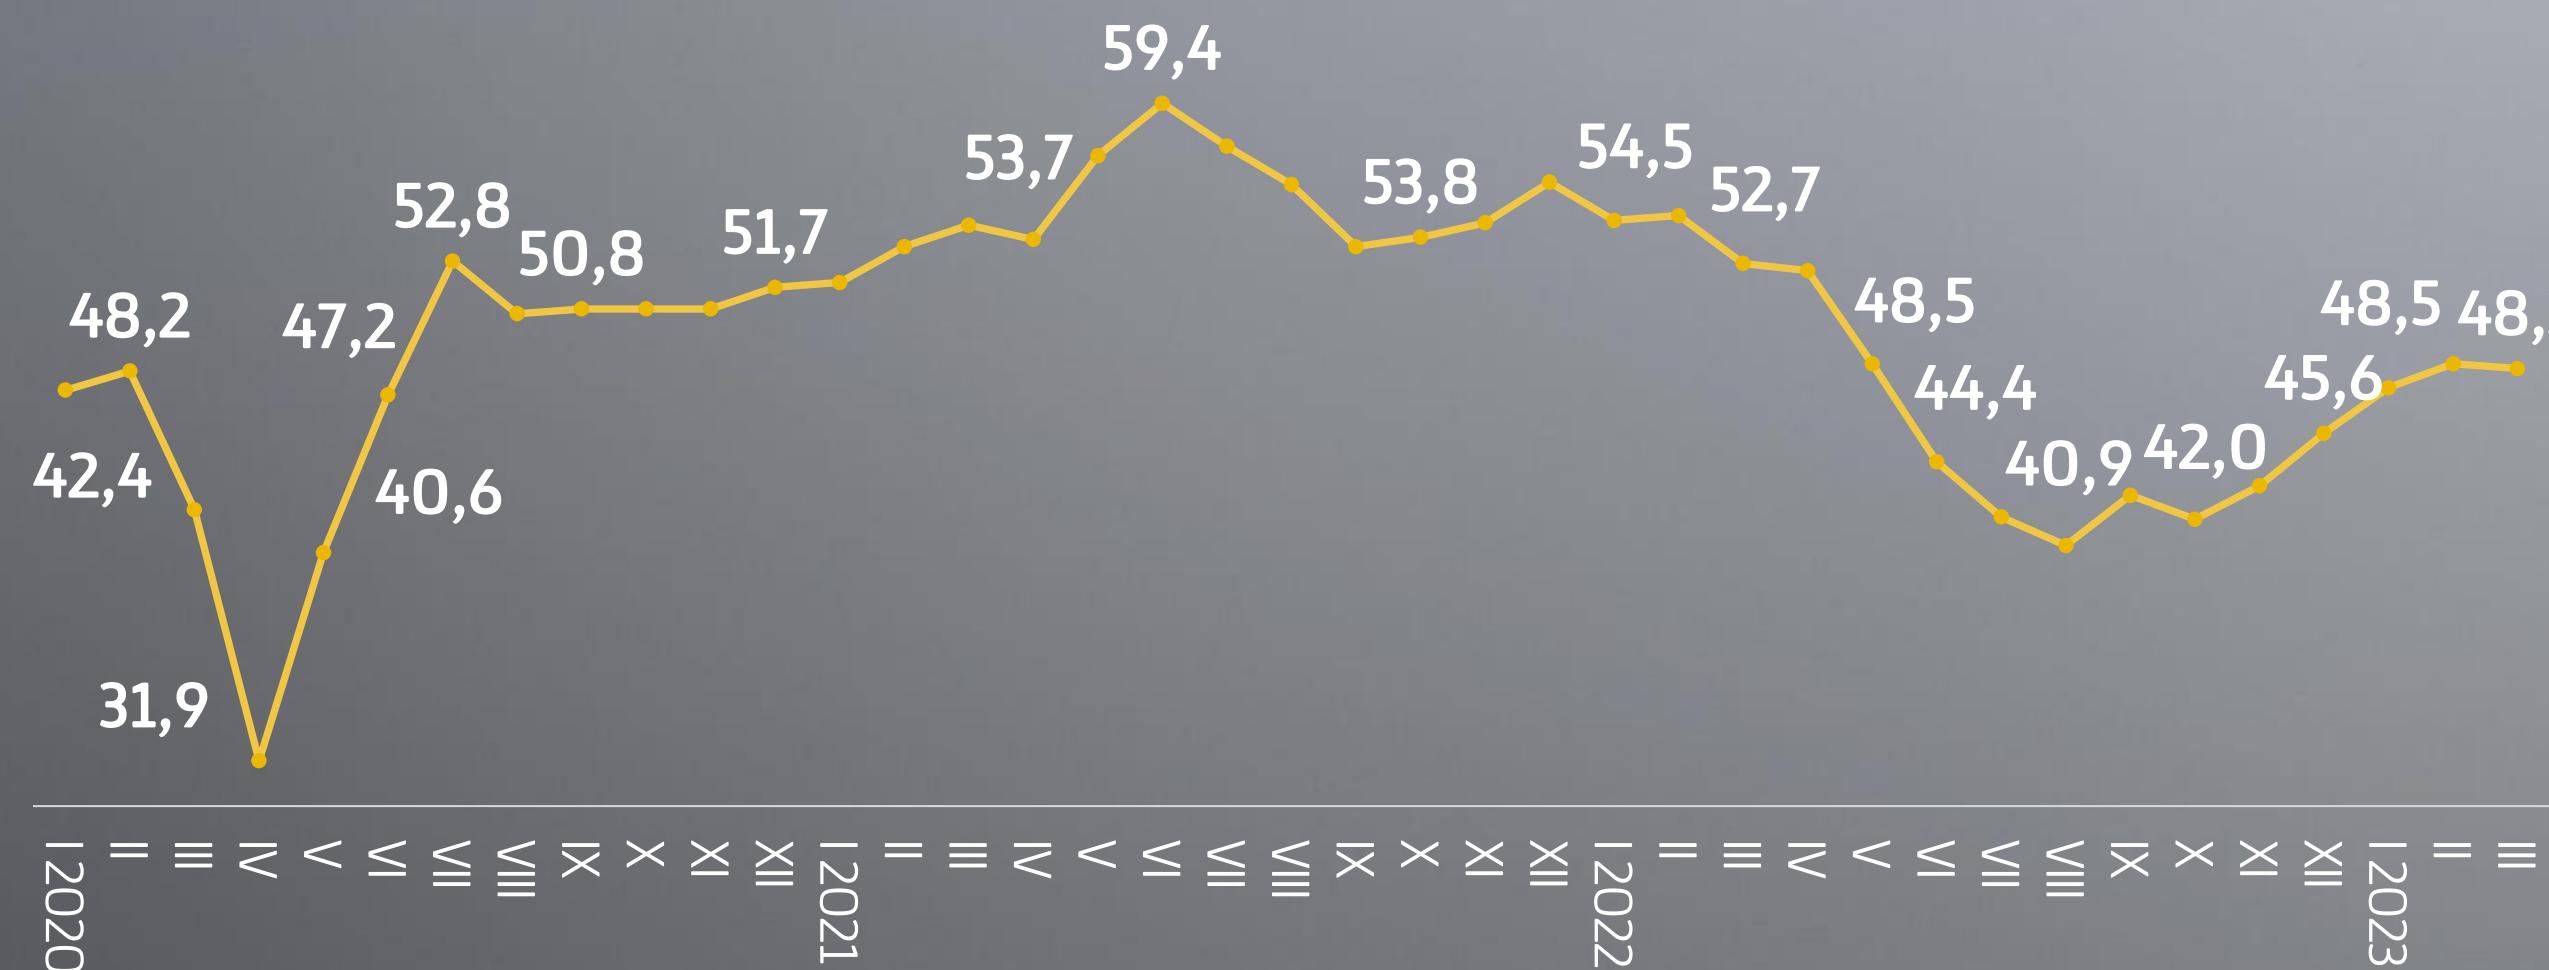

Inflation (%), reference rate in Poland (%)

Economists see potential for rate cuts in late 2023.

Macroeconomic background

PMI indicator for Poland

Growth in construction and assembly production (% y/y, constant prices)

The level of the PMI index is inspiring increasing optimism. Values are stabilising at their highest levels since May 2022 and reached 48.3 points in March (vs 48.5 in February).

The value of construction and assembly production fell by 1.5% y/y in March. In the January-March period, the index increased by 3.5% y/y, while the individual segments were as follows: (i) building construction (-6.4% y/y), specialised construction (+5.3% y/y), civil engineering construction (+13.7% y/y).

Macroeconomic background

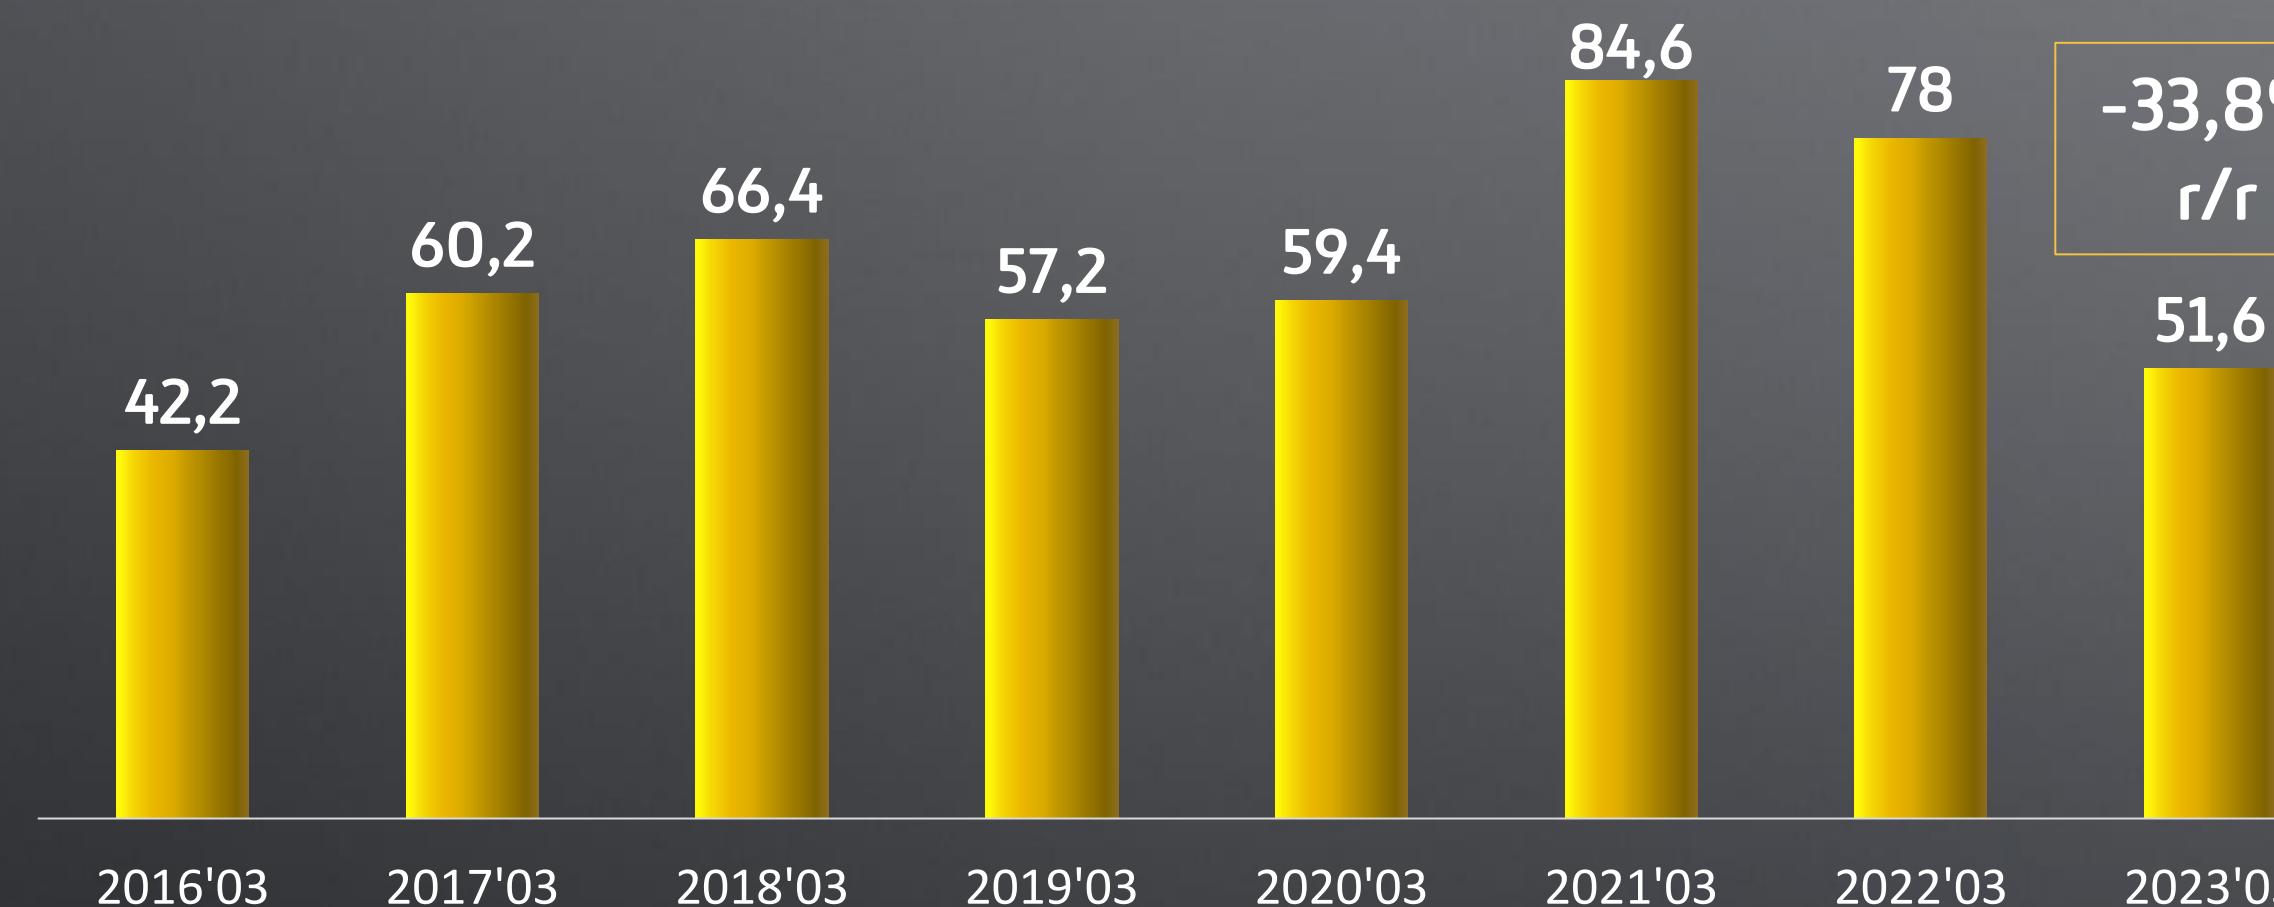

Average monthly salaries in Poland *

Salaries increased by 12.6% y/y in March, a lower reading than inflation. Construction is characterised by wage growth slightly below average (11.3% y/y)

*Data refers to companies with more than 10 employees.

Building permits - dwellings (data in thousands)

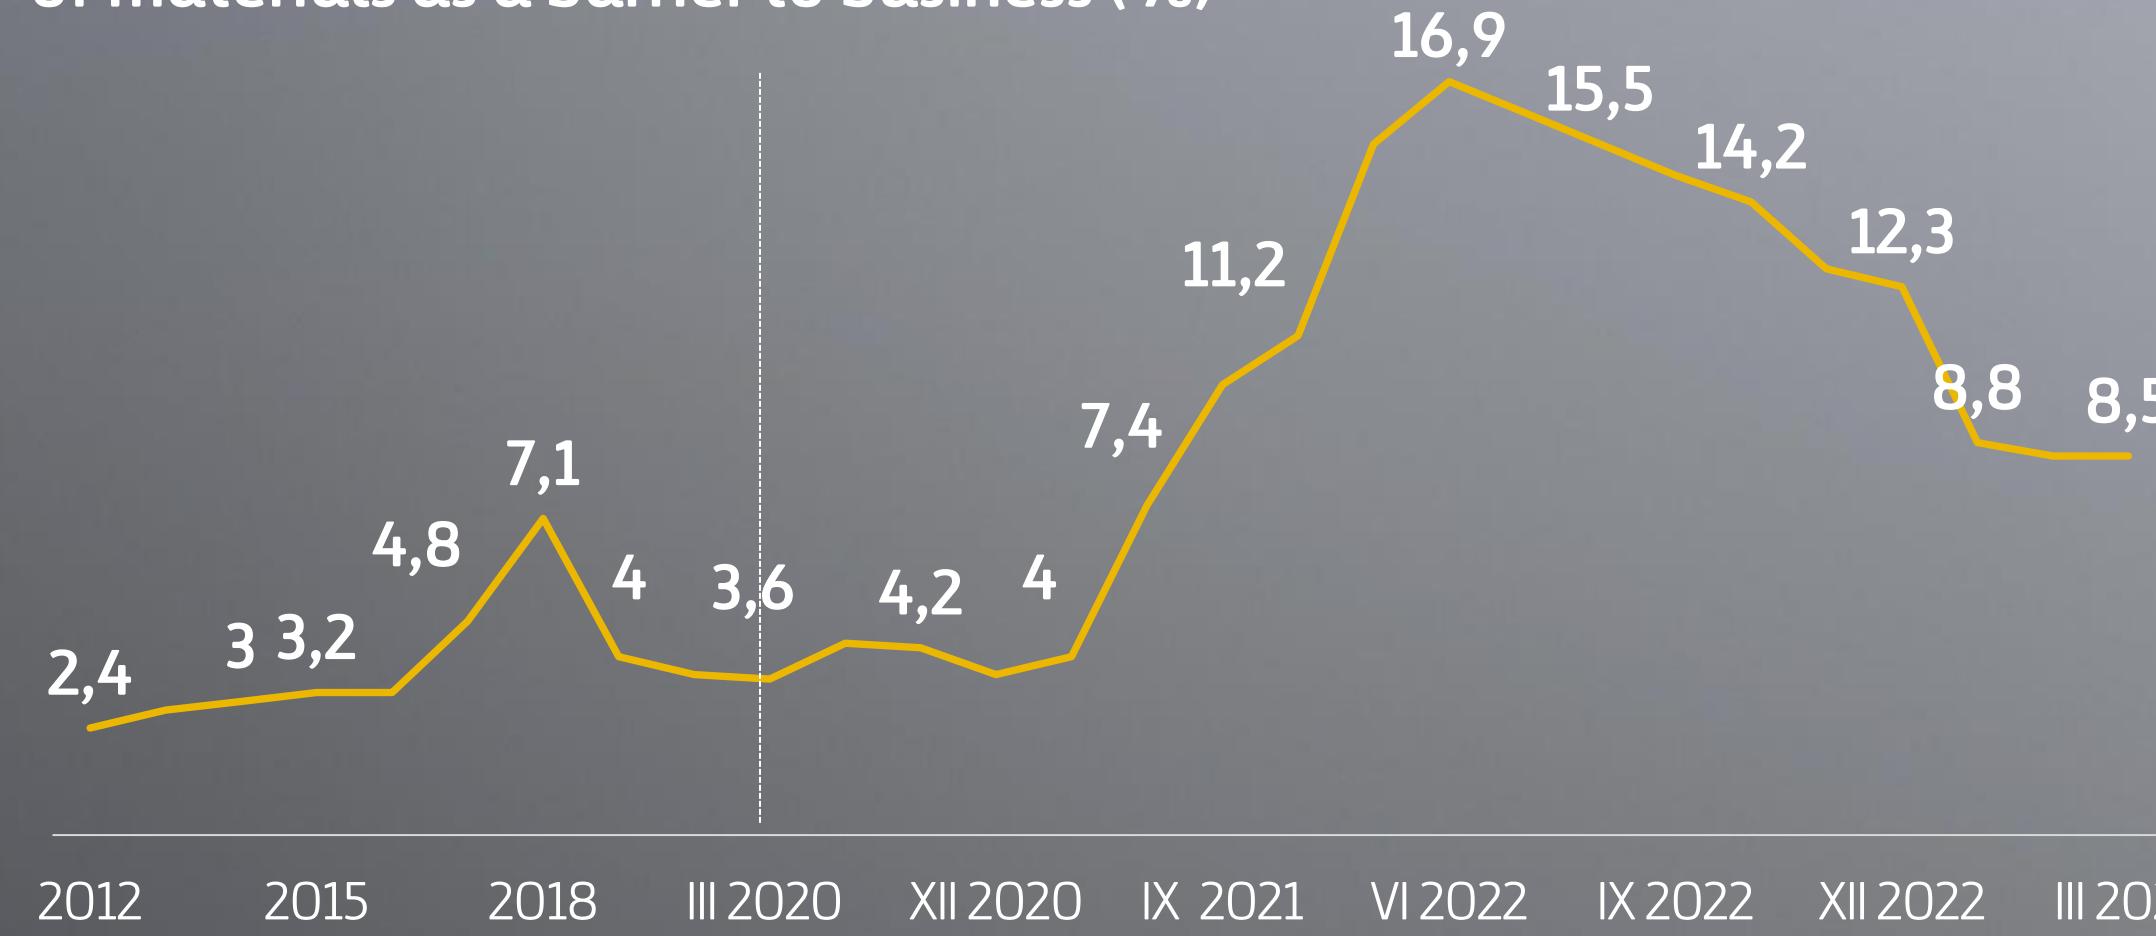

The first quarter of 2023 shows the weakest Q1 since 2016 in terms of housing permits (-33.8% y-o-y). Nevertheless, economists indicate that the worst of the period may be behind us as mortgage demand points to a recovery.

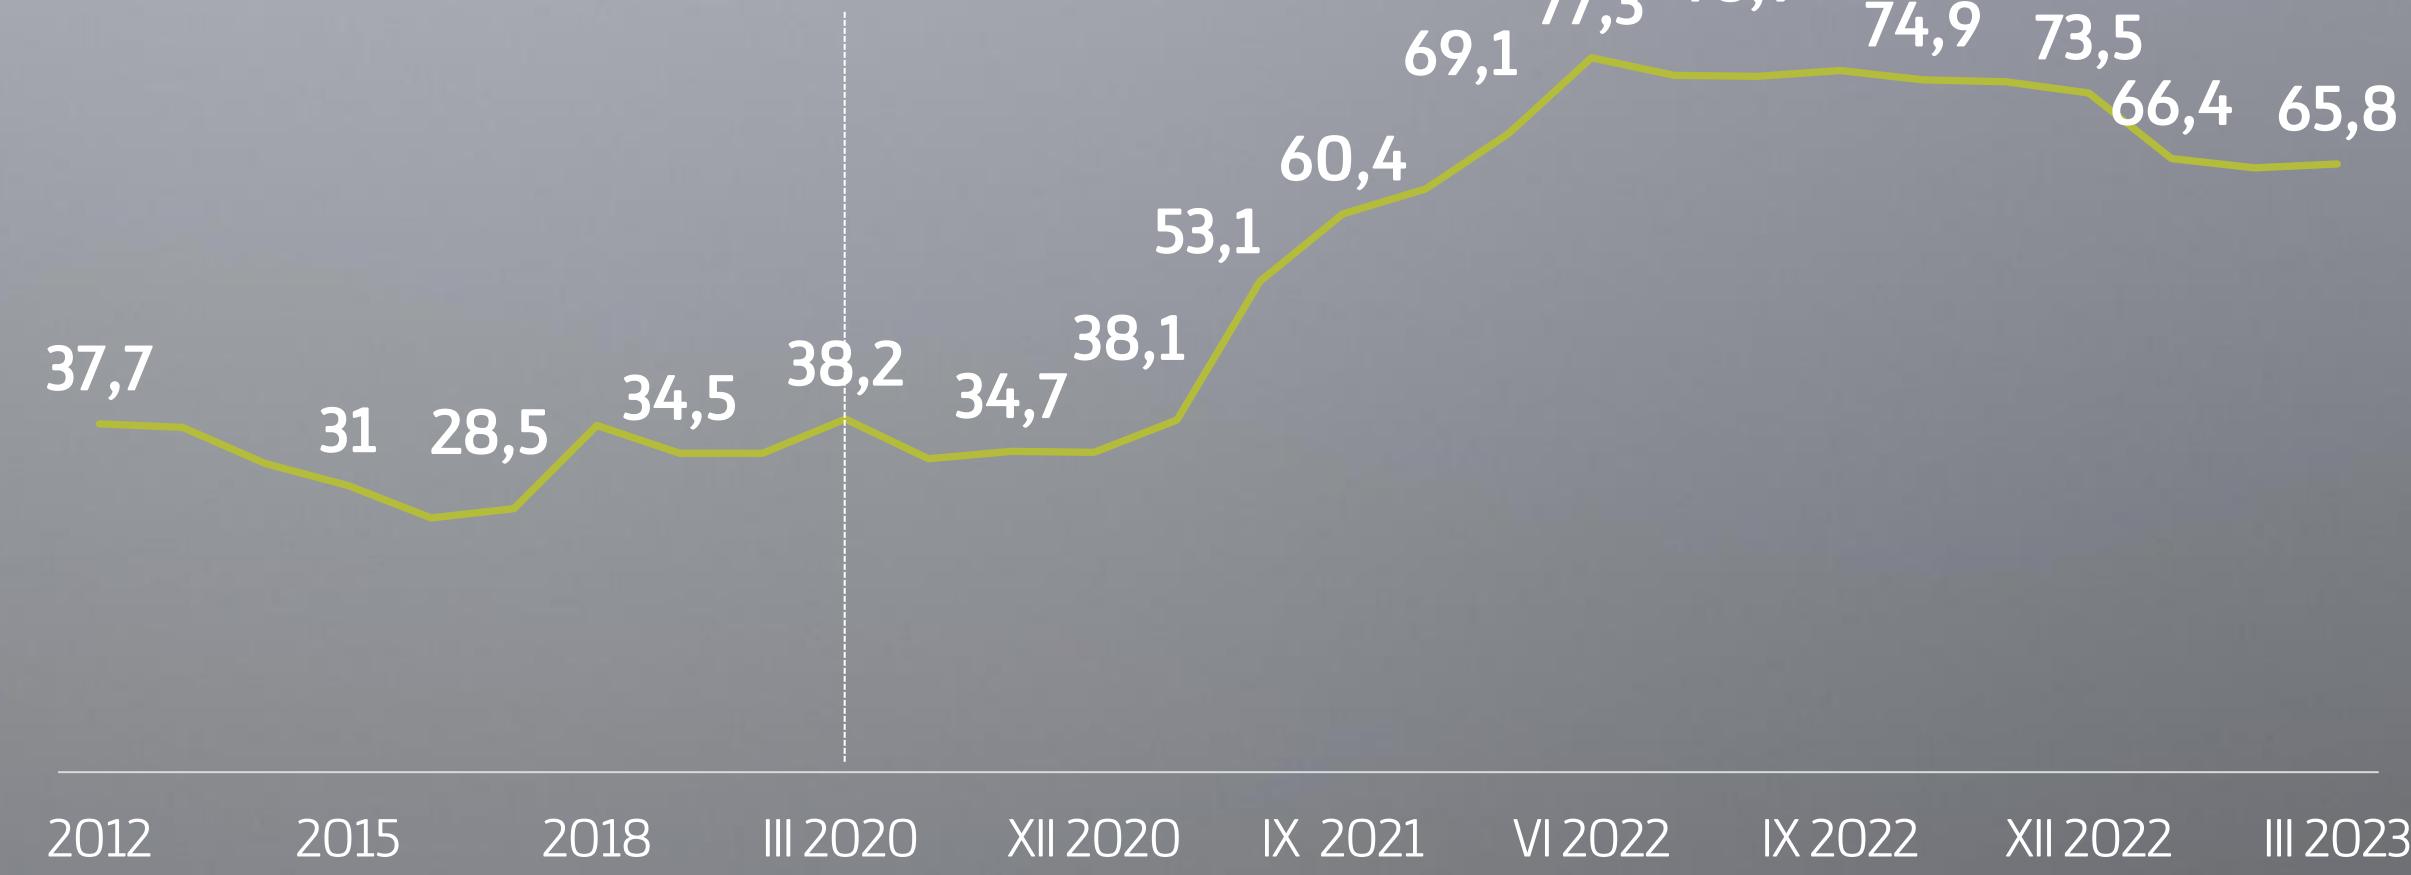

Situation of the construction industry – stabilisation and prospects for improvement

Services

Revenues (m PLN)

EBIT (m PLN)

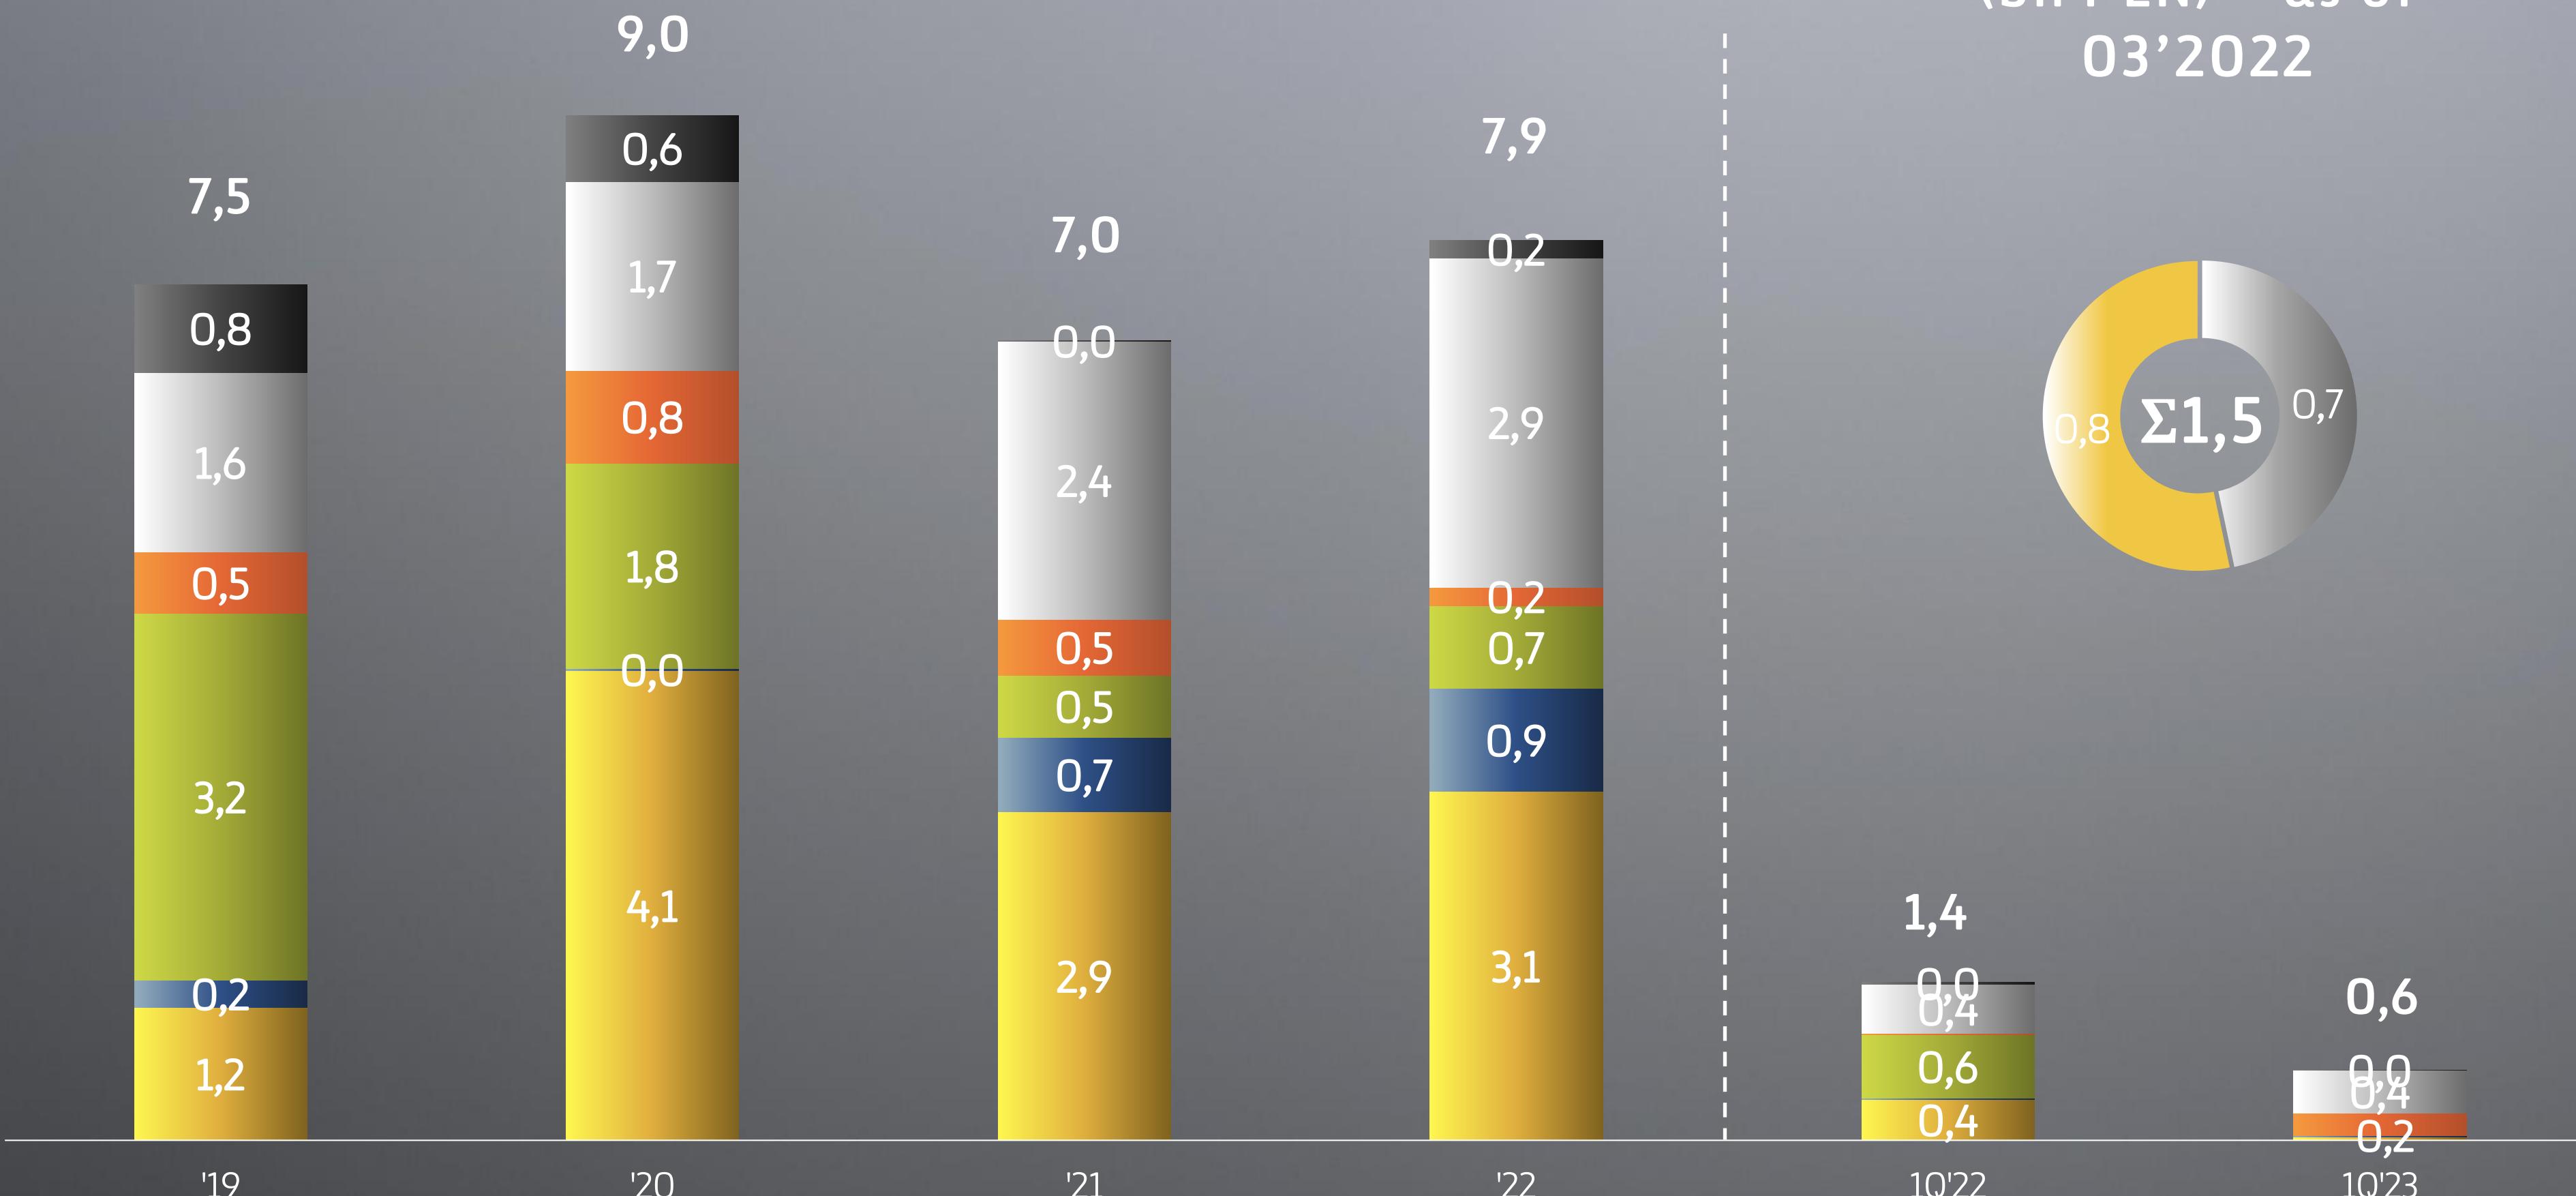

In Q1 2023, revenues in the construction segment increased by PLN 288 million year-on-year (+20.1% year-on-year).

The profitability of the construction segment amounted to 4.7%, which was higher than the previous year's result. The construction industry was less affected than a year earlier by the disrupted supply chains caused by the outbreak of the armed conflict in Ukraine. In addition, the prices of services offered by the main subcontractors in the first quarter of this year fluctuated noticeably less than in the same period last year.

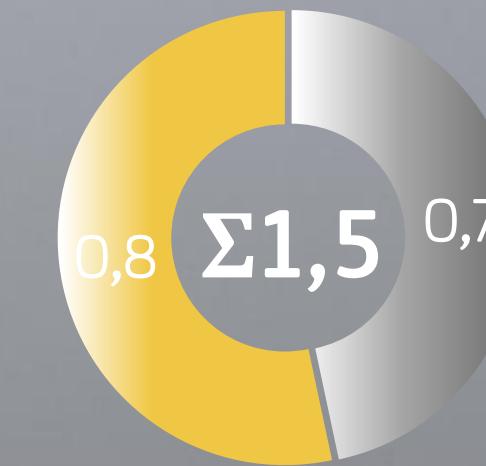

The current structure of the order book secures work for the whole of 2023 and a sizeable part of 2024.

The services segment generated sales revenue of PLN 218 million with a profitability of 9.9 per cent.

Mostostal Kraków – financial results

Steel price index (PUDS)

With the outbreak of war in 2022, steel supplies from Ukraine, Belarus have been curtailed and from Russia completely closed due to sanctions, a total of around 25% of Polish steel imports in 2021. In the last two months, steel prices have fallen by around 30%, yet they are still on average 20% more expensive than before the outbreak of war in Ukraine.

Steel construction plants are sensitive to simultaneous increases and volatility in raw material prices..

Price equilibrium is likely to be at higher levels than before the price shocks of in 2020 and 2022.

National investment programmes – rail

National Railway Programme

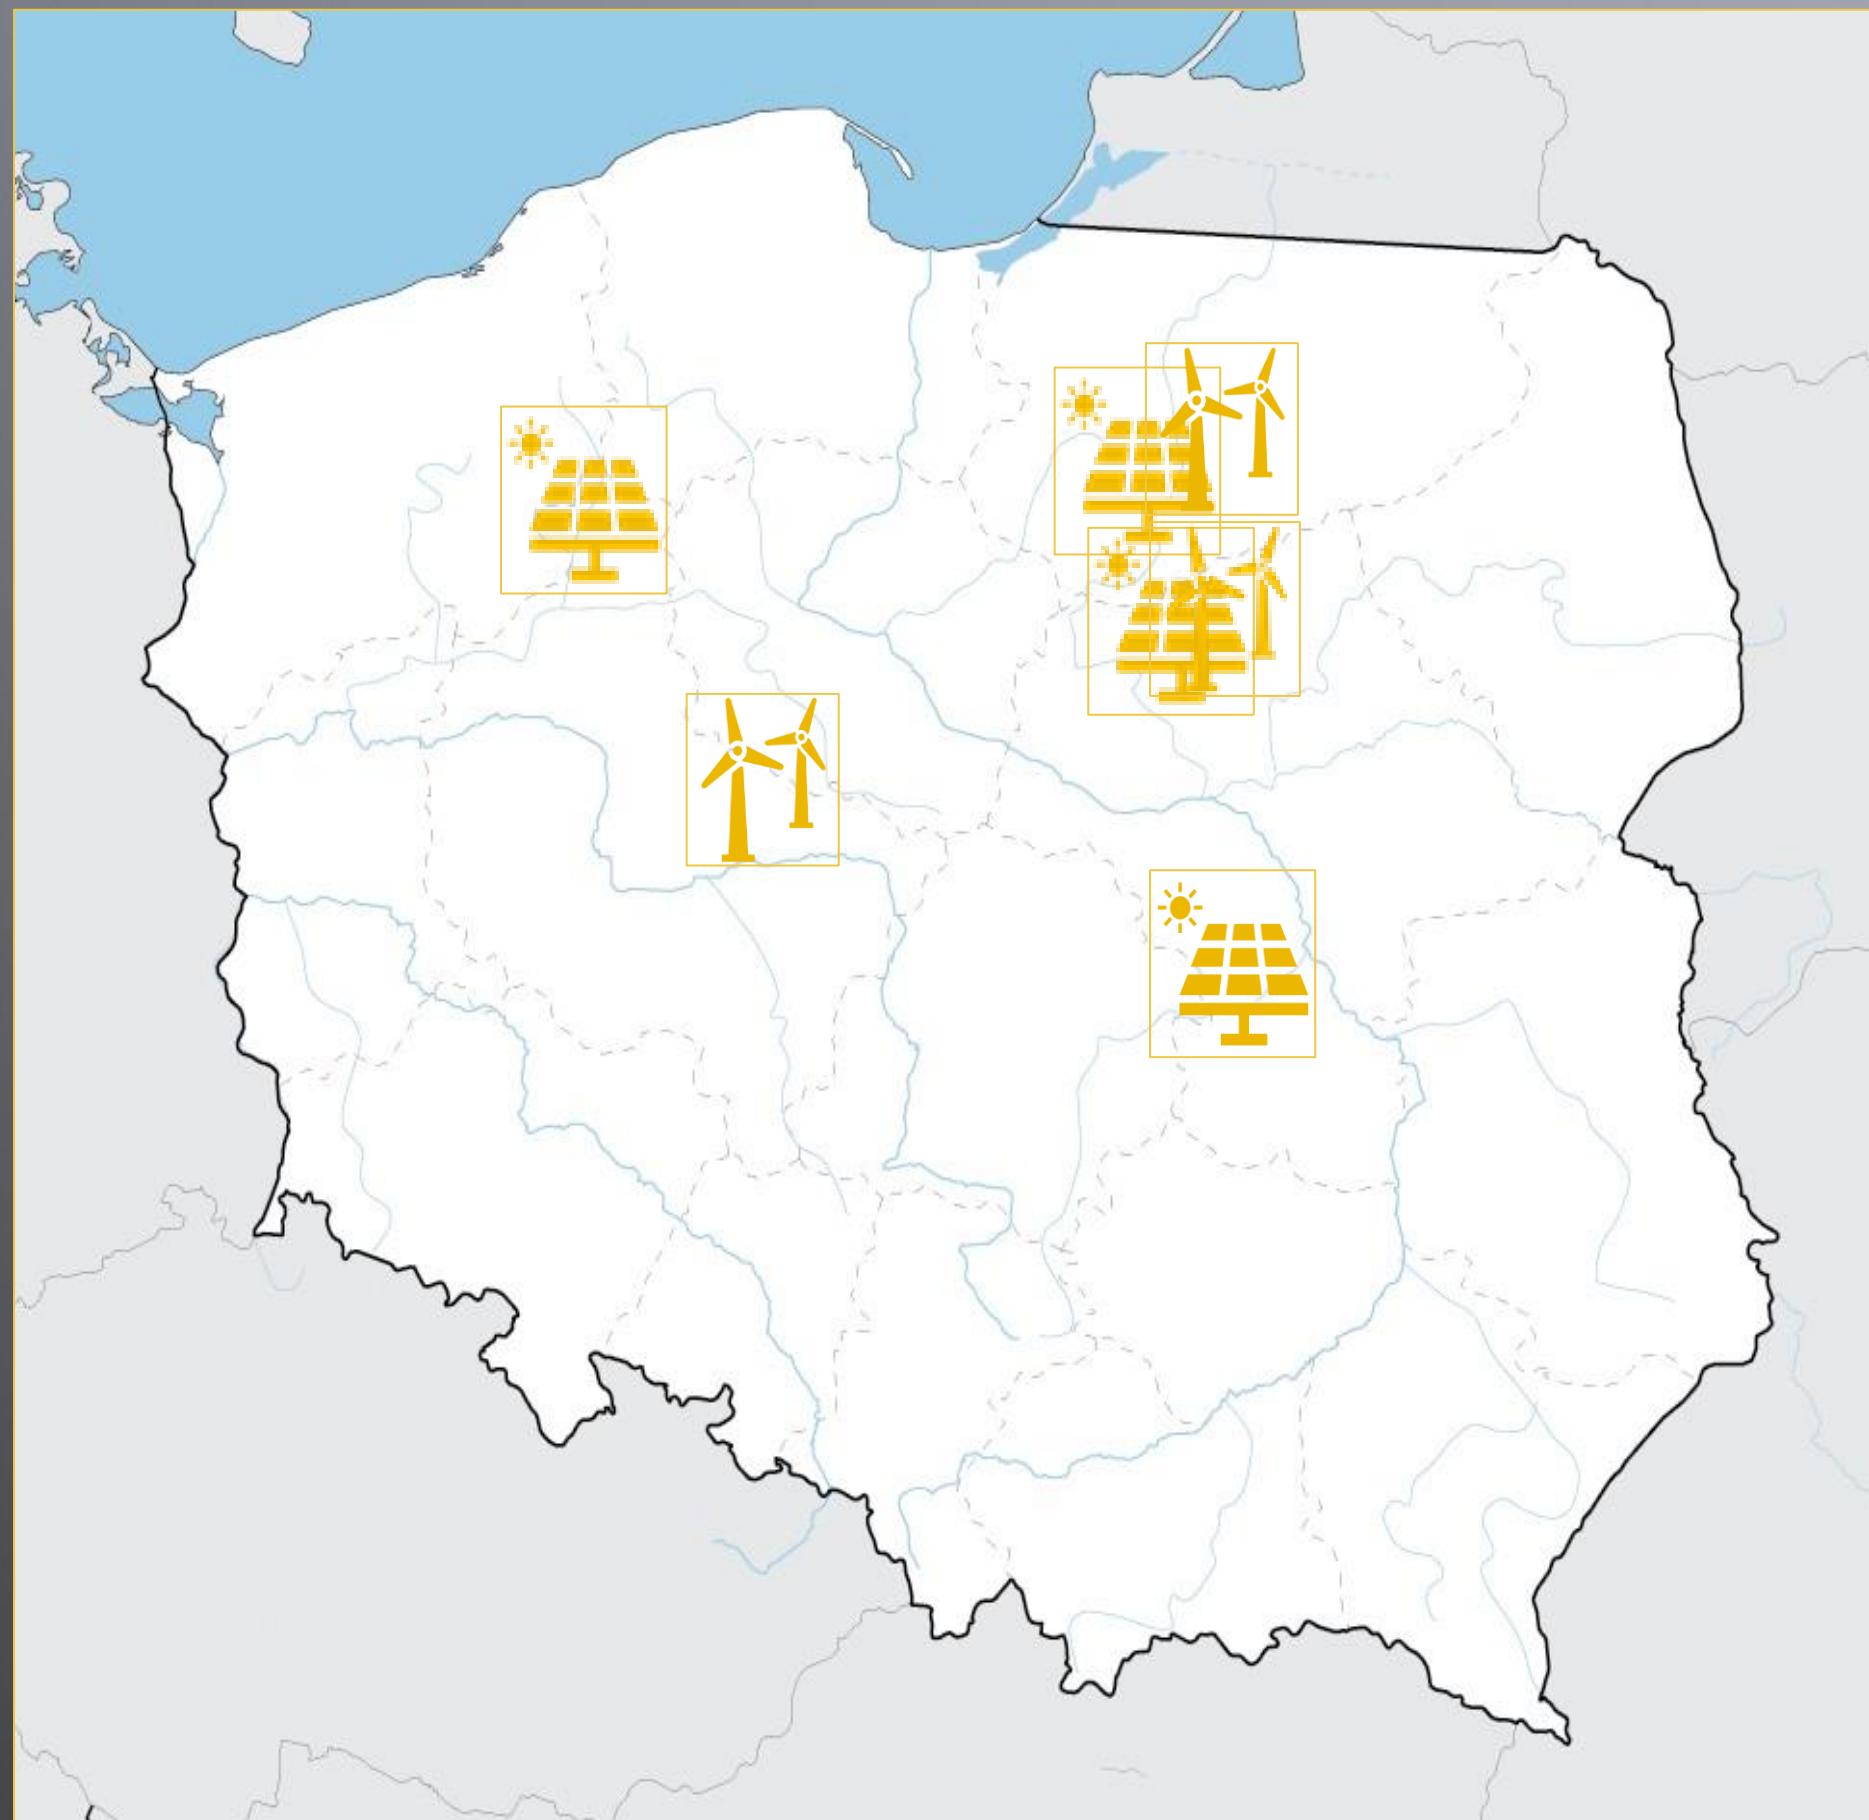

Rail+ programme (data in M PLN)

The Ministry of Infrastructure is launching consultations on the National Railway Programme worth PLN 80 billion. The programme is a direct continuation of the National Railway Programme until 2023. The document establishes the financial framework and conditions for the implementation of the state's intentions with regard to railway investments expected to be made by 2030.

The Rail + programme, detailed until 2029, confirms the dependence of rail investment on EU funds.

The target funding sources are the Cohesion Fund, the CEF programme and the National Reconstruction Programme (NRP). The planned PLN 11 billion for projects from the NIP is to be transferred to the NCP.

Budimex is involved in several projects at various stages of development with a total capacity of 112 MW PV and 110 MW wind. A 14 MW solar farm and a wind farm in Drachów are currently under construction.

Budimex's 51% share and Ferrovial's 49% share in the joint venture. Budimex as the leader of the construction market in Poland, while Ferrovial as a strong international partner with experience and resources in large investment projects in RES.

Cel to 500 MW do 2027/2028 roku – rozwój infrastruktury energetycznej począwszy od pozyskania gruntów, opracowania projektu, budowy farm PV i wiatrowych, eksploatacji, utrzymania. Nowe technologie i zielone źródła energii.

EU funds

European Funds for Infrastructure, Climate, Environment 2021-2027 (FENiKS) programme (EUR bn)

Connecting Europe Facility (CEF) - funds for all countries (EUR bn)

National Reconstruction Programme (EUR bn)

In December 2022, the European Commission (EC) approved all Polish Cohesion Policy programmes for 2021-2027, agreed on the basis of the developed Partnership Agreement. According to announcements from the Ministry of Funds and Regional Policy, the first competitions under the FEniKS programme (Infrastructure and Environment Programme) are expected to be launched in Q2 2023.

Support for infrastructure projects under the Connecting Europe Facility (CEF) competition instrument will also be important. In the rail market, four tenders are planned to apply for funding from the CEF2 Connecting Europe Fund.

The short-term outlook for the development of railway construction in Poland is directly linked to Poland's receipt of EU funds. The biggest question mark is the National Enclosure Plan (NEP), which is dependent on the government achieving milestones.
